

Hatem Abid Almahmadi

Risk Management Specialist GRCP™ GRCA™

General Authority for the Affairs of the Grand Mosque and the Prophet's Mosque

h.t.m.1@hotmail.com Makkah, Saudi Arabia hatim-alharbi011.github.io

Professional summary

Risk management specialist with more than ten years of experience in accounting, financial reporting, compliance and data analysis. I currently work in enterprise risk management, helping identify, assess and monitor risks, develop risk registers and treatment plans, and prepare reports that support decisions. I draw on my financial and analytical background to understand risks and controls and link them to objectives and processes. I use generative AI tools such as ChatGPT and Claude to analyse information, develop reports and models and improve workflow efficiency — reviewing and verifying every output before it is used.

Experience

Risk Management Specialist

June 2026 — present

General Authority for the Affairs of the Grand Mosque and the Prophet's Mosque — General Administration of Governance, Risk & Institutional Compliance

- Identify, analyse, assess and monitor enterprise risks in coordination with organisational units.
- Prepare and update risk registers and treatment plans, and follow up on risk status and actions with risk owners.
- Analyse risk levels and existing controls, and contribute to risk reports and indicators that support decisions.
- Help raise awareness of enterprise risk practices and improve monitoring and reporting methods.

Financial Accountant

August 2023 — June 2026

General Authority for the Affairs of the Grand Mosque and the Prophet's Mosque — Financial Administration for Endowment Affairs

- Prepared the project document for establishing endowment finance operations, including opening balances and financial statements.
- Designed interactive Power BI dashboards to track collections, revenue and beneficiary data, improving clarity and supporting decisions.
- Turned **1,961 endowment deeds** into an interactive Power BI dashboard to inventory, classify and analyse endowments and speed up access to information.
- Supervised and trained staff on Excel to improve performance and report quality.

Deputy Director of Collections, Accounts & Business Development (previous assignment)

- **Led** and delivered the **e-invoicing project** with the relevant parties.
- Helped unify rental values for telecom towers and settle outstanding dues, and contributed to investment returns through the returned-items valuation committee.
- Wrote a specialised study on VAT applications in the endowment sector.

VAT Accountant

December 2022 — August 2023

General Authority for the Affairs of the Grand Mosque and the Prophet's Mosque — Accounts & Assets Administration

- Core member of the committee correcting VAT returns **from 2018 to 2024**.
- Took part in moving accounting from a cash basis to an accrual basis.

Accounting Specialist

September 2013 — July 2022

Ikhwan Saudi Trading Company — Jeddah

- Prepared and reviewed monthly VAT returns for **ten business lines** in one tax group, ensuring compliance and a clean record **with no violations**.
- Represented the company before ZATCA and handled tax transactions and returns online.
- Prepared monthly and annual financial statements, bank reconciliations and petty-cash reviews, strengthening report reliability.
- Supervised monthly cash counts and helped develop the accounting system in line with operational needs.

SOCPA · May 2024

Skills

Risk management, governance & compliance

- **Enterprise risk management (ERM):** identifying, analysing, assessing and monitoring risks.
- **Risk registers:** preparing and updating risk registers, treatment plans, and risk reports and indicators.
- **GRC:** governance, risk and compliance, internal controls and decision support.

Analysis & technology

- **Dashboards:** data analysis and interactive dashboards with Power BI and Excel.
- **Advanced Excel:** including Power Query, Pivot Tables and KPI analysis.
- **Generative AI:** using tools such as ChatGPT and Claude to analyse information and develop reports and models.

Management & personal

- **Analytical thinking:** problem solving and accurate review of data and transactions.
- **Communication:** effective communication, public speaking and working with internal and external teams.
- **Leadership & organisation:** supervising and training staff, time management, prioritising and adaptability.

Responsible AI use

- **Where I use it:** analysing data and summarising information, drafting reports and presentations, and building formulas and models in Excel and Power BI.
- **How I control it:** I review every output and check its figures and sources before using it — the final decision stays human.
- **Why:** to cut routine work and leave more time for analysis and professional judgement.
